17 February 1969

BRIEFING NOTE FOR THE DIRECTOR OF CENTRAL INTELLIGENCE

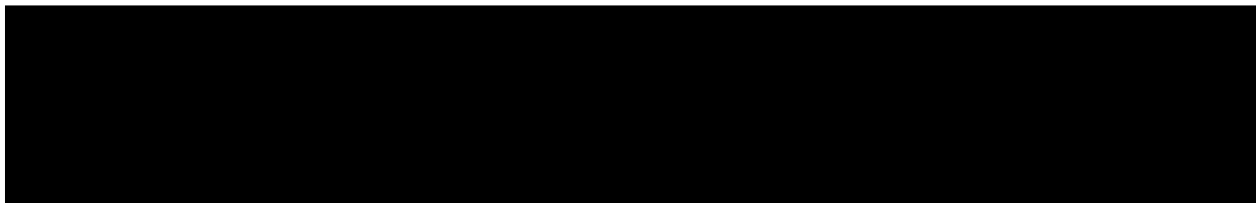

SUBJECT: Briefing Note for the February 18, 1969, 303 Committee Meeting, reference - Air Reconnaissance of South China

The attached paper was prepared in JRC with assistance from NRO and CIA. This paper adequately supports the need for resumption of overflights of South China and outlines the reconnaissance systems either available or planned for such missions.

We support this recommendation; however, it is suggested that you emphasize the need for coverage of all COMIREX targets in the remainder of China. A more desirable 303 Committee action would be approval of immediate resumption of aerial reconnaissance over all of China.

An additional point which was not stressed in the attached paper,
